SPEAKERS' BIOGRAPHY

Adrian CONSTANTIN

Shift Lead Dispatcher at the National Dispatching Center, with more than 12 years of experience in power systems engineering from which 3 years of international experience at TSCNET Services, one of Europe's Regional Coordination Center. Expertise in real-time operations, coordinated security assessment and grid optimisation, capacity calculation and energy markets.

Giorgi VAKHTANGADZE

Giorgi Vakhtangadze is an electrical power system planning expert with 15 years of experience in the field. He currently serves as the Head of the Power System Strategic Development Department at the Georgian State Electrosystem. His responsibilities include long-term system development, preparation of the Ten-Year Network Development Plan, and conducting studies to enhance the resilience of the Georgian power system, as well as developing the Grid Code.
